

# RF EXPOSURE **EVALUATION REPORT**

**APPLICANT** 

Beijing Beast Technology Co., Ltd.

PRODUCT NAME

Speedforce

**MODEL NAME** 

**B08** 

TRADE NAME

**SPEEDX** 

BRAND NAME

**SPEEDX** 

FCC ID

2AHU3SPD-0000B08

47CFR 2.1091

STANDARD(S)

KDB 447498 D01 General RF Exposure

**ISSUE DATE** 

CATIONS TECHNOLOGY Co., Ltd. SHENZHEN MORLAB COMMUN

NOTE: This document is issued by MORLAB, the test report shall not be reproduced except in full without prior written permission of the company. The test results apply only to the particular sample(s) tested and to the specific tests carried out which is available on request for validation and information confirmed at our website.

## 1. TECHNICAL INFORMATION

Note: the following data is based on the information by the applicant.

# 1.1. Identification of Applicant

Company Name:	Beijing Beast Technology Co.,Ltd.					Z We	AB GRLAD
Address:	Room 2	2508	Building	B,Tower	2	Wangjing	SOHO,Chaoyang
IN MORE ME	District,B	District,Beijing,China					QLAD NORL

## 1.2. Identification of Manufacturer

Company Name:	Beijing Beast Technology Co.,Ltd.						
Address:	Room 2508 Building B, Tower 2 Wangjing SOHO, Chaoyang						
AE OFLA MORE	District,Beijing,China					S MIL	AB ARLA

# 1.3. Equipment Under Test (EUT)

Model Name:	Speedforce
Trade Name:	SPEEDX
Brand Name:	SPEEDX
Hardware Version:	V30
Software Version:	V1.0.6
Frequency Bands:	Bluetooth 4.0;
Modulation Mode:	Bluetooth 4.0:GFSK;
Antenna type:	Fixed Internal Antenna
Development Stage:	Identical prototype

## 1.3.1. Photographs of the EUT

#### EUT front view

#### 2. EUT rear view

#### 1.3.2. Identification of all used EUT

The EUT identity consists of numerical and letter characters, the letter character indicates the test sample, and the following two numerical characters indicate the software version of the test sample.

EUT Hardware Version		Software Version
1#	V30	V1.0.6

# 1.4. Applied Reference Documents

Leading reference documents for testing:

No.	Identity	Document Title
1 OPLAS	47 CFR§2.1091	Radiofrequency Radiation Exposure Evaluation: mobile devices
2	KDB 447498 D01v06	General RF Exposure Guidance

#### 2. DEVICE CATEGORY AND RF EXPOSURE LIMIT

Per user manual, this device is Speedforce. Based on 47CFR 2.1091, this device belongs to mobile device category with General Population/Uncontrolled exposure.

#### **Mobile Devices:**

47CFR 2.1091(b)

For purposes of this section, a mobile device is defined as a transmitting device designed to be used in other than fixed locations and to generally be used in such a way that a separation distance of at least 20 centimeters is normally maintained between the transmitter's radiating structure(s) and the body of the user or nearby persons. In this context, the term "fixed location" means that the device is physically secured at one location and is not able to be easily moved to another location. Transmitting devices designed to be used by consumers or workers that can be easily re-located, such as wireless devices associated with a personal computer, are considered to be mobile devices if they meet the 20 centimeter separation requirement.

#### **GENERAL POPULATION / UNCONTROLLED EXPOSURE**

The general population/uncontrolled exposure limits are applicable to situations in which the general public may be exposed or in which persons who are exposed as a consequence of their employment may not be made fully aware of the potential for exposure or cannot exercise control over their exposure. Members of the general public would come under this category when exposure is not employment-related; for example, in the case of a wireless transmitter that exposes persons in its vicinity. Warning labels placed on low-power consumer devices such as cellular telephones are not considered sufficient to allow the device to be considered under the occupational/controlled category, and the general population/uncontrolled exposure limits apply to these devices.

TABLE 1—LIMITS FOR MAXIMUM PERMISSIBLE EXPOSURE (MPE)

Frequency range (MHz)	range strength strength		Power density (mW/cm²)	Averaging time (minutes)
(i	B) Limits for General	Population/Uncontro	lled Exposure	
0.3-1.34	614	1.63	*(100)	30
1.34-30	824/f	2.19/f	*(180/f <sup>2</sup> )	30
30-300	27.5	0.073	0.2	30
300-1500	-	-	f/1500	30
1500-100,000	-	-	1.0	30

f = frequency in MHz

<sup>\* =</sup> Plane-wave equivalent power density

#### 3. MEASUREMENT OF CONDUCTED PEAK OUTPUT POWER

1. Bluetooth Conducted Average Output Power

Band	Channel	Frequency (MHz)	Output Power(dBm) GFSK
ВТ	0	2402	-2.65
	19	2440	-3.38
	39	2480	-5.11

#### 4. RF EXPOSURE EVALUATION

Standalone transmission MPE evaluation

Frequency		Antenna	Conducted	Time-averaging	Power	Limit for
Bands	(MHz)	Gain (dBi)	Power (dBm)	EIRP (mW)	density (mW/cm²)	MPE (mW/cm²)
BT4.0	2402	2.6	-2.65	0.999	0.0002	1.0

Note:

1. MPE calculation method

Power Density = EIRP/ $4\pi$ R<sup>2</sup>

Where: EIRP = P·G

P = Peak out power

G = Antenna gain

R = Separation distance (20cm)

# ANNEX C GENERAL INFORMATION

#### 1. Identification of the Responsible Testing Laboratory

Company Name:	Shenzhen Morlab Communications Technology Co., Ltd.
Department:	Morlab Laboratory
Address:	FL.3, Building A, FeiYang Science Park, No.8 LongChang Road, Block 67, BaoAn District, ShenZhen, GuangDong Province, P. R. China
Responsible Test Lab Manager:	Mr. Su Feng
Telephone:	+86 755 36698555
Facsimile:	+86 755 36698525

### 2. Identification of the Responsible Testing Location

Name:	Shenzhen Morlab Communications Technology Co., Ltd. Morlab Laboratory
Address:	FL.3, Building A, FeiYang Science Park, No.8 LongChang
	Road, Block 67, BaoAn District, ShenZhen, GuangDong
	Province, P. R. China
